ISO 45003

Karza can help you evolve your occupational health and safety management system (ISO 45001, BS OHSAS 18001 or AS/NZS 4801) to better managing your organisation's psychosocial risks and help protect your employees' mental health.

ISO 45003 'Occupational health and safety management – Psychological health and safety at work – Guidelines for managing psychosocial risks' provides direction on managing psychological health and safety risks within your existing occupational health and safety management system.

At Karza, we believe implementing the ISO 45003 standard will provide your organisation with a set of tools to better enable organisational sustainability and resilience.
