

Karza can provide organisations with support during the planning, development, evolution and maintenance of an Anti-Bribery Management System (ABMS) structured on

- ISO 37001:2016 '*Anti-Bribery Management Systems - Requirements with guidance for use*'; or
- BS 10500:2011 '*Specification for an anti-bribery management system*'.

Your ABMS planning, development and maintenance requirements can be completely outsourced or a co-operative sourcing arrangement can be established, providing your organisation with extra resources in times of resource or skills shortage. Karza also provides ABMS auditing.
