

The Karza logo is written in a white, hand-drawn, brush-stroke style font on a dark blue rectangular background. The letters are slightly irregular and have a textured appearance. Below the text are three horizontal white brush strokes of varying lengths, suggesting a signature or a stylized underline.

Karza

Local Government Risk Support

We found a local government authority had inspected and accepted their principal contractor utilising this type of temporary construction as a 'suitable' and 'safe' pedestrian access method for the public crossing a council construction area.

When challenged, the Council responded with:

**“It is not our issue;
It is our contractors”**

Don't let this happen in your Shire! Karza can help your team get your risk and contractor management back on board before someone gets hurt!
